CoCoALib - Support #1013

GlobalManager: name of object in examples (and tests)

24 Feb 2017 14:13 - John Abbott

Status:	New	**Start date:**	24 Feb 2017
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	10%
Category:	Renaming	**Estimated time:**	0.00 hour
Target version:	CoCoALib-1.0	**Spent time:**	0.10 hour

Description

At the moment all CoCoALib examples use the name **CoCoAFoundations** for the GlobalManager object.

Is there a better name we could use? *e.g.* **InitializeCoCoA**

History

#1 - 24 Feb 2017 14:16 - John Abbott

- Category set to Renaming

- Target version set to CoCoALib-1.0

- % Done changed from 0 to 10

In just a couple of days I shall have to present CoCoALib and its examples.
Indeed, I shall probably concentrate on the examples (since the audience is not so interested in the inner workings).

I do not much like the name **CoCoAFoundations**; it may be correct, but is perhaps not so self-explanatory.

Would **InitializeCoCoA** be more comprehensible?

Any better suggestions?

> Would **InitializeCoCoA** be more comprehensible?

Perfect!
