<b>Description</b>			
Why are there the following two manual pages?			
? operators, shortcuts			
? CoCoA operators			
Can they be condensed into a single page?

I also note that in the page for operators, shortcuts we use .. to mean "missing expression" but also to mean the range operator.

This is unfortunately ambiguous :-/

operators, shortcuts  
is in the list of commands/functions

CoCoA operators  
is in the chapter about operators. I changed the title into  
CoCoA operators: introduction

- Status changed from New to Resolved

- % Done changed from 0 to 80

##### #4 - 04 Dec 2017 11:41 - Redmine Admin

- Target version changed from CoCoA-5.?.? to CoCoA-5.2.2

##### #5 - 04 Dec 2017 12:19 - Anna Maria Bigatti

- % Done changed from 80 to 90

Now the "cocoa operators: introduction" is shorter (I commented out the part on priority, I'm not 100% sure...)  
I also fixed and added a few things.
