

CoCoA-5 - Bug #1076

EmacsUI: interrupt copies line cursor is on to bottom then interrupts

12 Jun 2017 18:25 - John Abbott

Status:	New	Start date:	12 Jun 2017
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	EmacsUI	Estimated time:	0.00 hour
Target version:	CoCoA-5.?.?	Spent time:	0.25 hour
Description			
Using Emacs, if you move the cursor away from the bottom line in the *cocoa5* buffer, and then interrupt a computation, the line the cursor was on is copied (in bold) to the bottom of the buffer, then the interrupt happens.			
I think the line should not be copied.

Marked as low priority because it appears to be harmless, just "unsightly".

I suspect it may be a feature of comint, so perhaps there is already an emacs flag to disable it?
