Description

I have noticed some functions whose names do not follow the naming conventions: *e.g.* **quorem** and **divexact**

What to do?

History

#1 - 21 Jun 2018 15:39 - John Abbott

In **BigIntOps** there are quorem and divexact (names "inherited" from GMP); but there is also QuoRem in another file!

NOTE add here any other names you find:
