Description
By chance I landed on the download page for CoCoA-4 -- apparently we still have such a page!
It caused Firefox on my machine to consume 100% CPU.
Do we even still need this page?

I am inclined to remove the web pages about downloading CoCoA-4.

If we really want to continue to make it available, then I'd prefer to make only 4.7.5 available (and not any older versions).
