CoCoA-5 - Bug #1435

Disable readline if input is redirected

04 Mar 2020 20:30 - John Abbott

Status:	New	**Start date:**	04 Mar 2020
Priority:	Normal	**Due date:**

Target version:	CoCoA-5.4.2	**Spent time:**	0.00 hour

Description

I was surprised to discover that ./cocoa5 < file.cocoa5 echoed the contents of file.cocoa5.

It turns out that the input passes through readline which echoes every line.

Currently one should execute **./cocoa5 --no-readline < file.cocoa5**

This is inconvenient!
