CoCoA-5 - Support #1454

Filenames in release CoCoAManual/html containing [obsolete]

04 May 2020 16:14 - John Abbott

Status:	New		Start date:	04 May 2020
Priority:	Normal		Due date:	
Assignee:	Anna Maria Bigatti		% Done:	0%

Target version:	CoCoA-5.4.2		Spent time:	0.40 hour
Description				
Currently files in CoCoAManual/html/ corresponding to obsolete/obsolescent commands have names containing square brackets. Do we want to change the file names so that they do not contain "funny" chars?

An example is **cmdCast[OBSOLETE].html**

On my linux box names with square brackets are printed out (by ls) inside single quotes to avoid the square brackets having some strange interpretation.

Might it be better to use a name such as **cmdCast-OBSOLETE.html**?

I note that the square brackets are allowed inside URIs (so the browser should accept them). A shell may do something odd...

OK, I'll find out how to do this in practice
