Description

Exactly which files should be in the directory **CoCoAManual**/?

Currently, there are Makefile and README...

I do not like the function copy-CoCoAManual in the script release-common.sh.
Currently it copies everything, and then deletes/moves some files.
It would be better if only the needed files were copied.
Then it would also be clearer exactly what we want to be in the release!
The current impl is too hard to follow for me :-/

- Status changed from New to In Progress

- % Done changed from 0 to 50

I have changed the impl of the fn copy-CoCoAManual. I have checked it in without testing!!
Anna: please check my change!

- Status changed from In Progress to Feedback

- Assignee set to John Abbott

- % Done changed from 50 to 90

I guess we shall soon find out if the new script has overlooked some file(s).
Status: feedback.
