

CoCoA-5 - Design #1533

RingElem and IndetSymbols not compatible

06 Nov 2020 13:34 - John Abbott

Status:	In Progress	Start date:	06 Nov 2020
Priority:	Low	Due date:	
Assignee:		% Done:	10%
Category:	enhancing/improving	Estimated time:	0.00 hour
Target version:	CoCoA-5.4.2	Spent time:	0.30 hour
Description The functions RingElem and IndetSymbols are sort-of-inverses; but we could perhaps do better? <pre>P ::= QQ[a,b[1]]; L := IndetSymbols(P); --> list of RECORDs RingElem(P, L[1]); --> ERROR RingElem(P, concat([L[1].head], L[1].indices)); --> OK</pre> The last line above is a bit ugly! Should we make it simpler/neater?

#3 - 06 Nov 2020 13:56 - John Abbott

The obvious convenient solution would be to allow RingElem to accept the RECORD produced by IndetSymbols.
Might that cause problems?
