FloorLog2 or SizelnBase?

| Description In several places FloorLog2 is used to obtain a quick estimate of the size of an integer; however, SizelnBase is noticeably faster (and just as accurate, if the base is 2). Check through the code, and replace FloorLog2 by SizelnBase where appropriate. | | | |

History

#1 - 21 Apr 2022 19:33 - John Abbott

I had completely forgotten that we had created SizelnBase. FloorLog2 is fairly quick, but SizelnBase is instant.

I do not really expect changing the calls to make a great speed difference, but it is worth changing just for "cleanliness" (and to remind me that SizelnBase is the quick size estimate fn).

#2 - 06 May 2022 15:04 - John Abbott

- Status changed from New to In Progress

- % Done changed from 0 to 10

Would it not be better to use the name **BitSize** rather than require that the user call SizelnBase(N,2)?
Would we even need to make SizelnBase public?

#3 - 06 May 2022 15:19 - John Abbott

Anna says that I should have impl'd FloorLog2 so that it calls SizelnBase directly. Oops. Why did I not think of that?

#4 - 06 May 2022 21:06 - John Abbott

- Status changed from In Progress to Feedback

- % Done changed from 10 to 90

Changed impl of FloorLog2 as described above... why was it not already like that? No idea!
All tests pass.

#5 - 13 Jun 2022 15:04 - John Abbott

SizelnBase is called only rarely; I have replaced one by a call to FloorLog2 because I think it makes the code clearer.

I shall remove the default value for arg 2 in SizeInBase since it makes no sense (to me now).

- *Related to Design #1693: SizeInBase: obsolete added*

#7 - 08 Aug 2022 20:16 - John Abbott

- *Status changed from Feedback to Closed*

- *% Done changed from 90 to 100*

- *Estimated time set to 1.66 h*

After discussion with Anna we have decided that SizeInBase is obsolete; so the original question here is no longer relevant.

FloorLog2 has been made faster (both for BigInt and for machine ints).
