CoCoA-5 - Bug #1708

Linux: just 1 executable, should be 2 (with & without readline)

02 Nov 2022 10:31 - John Abbott

Status:	New		**Start date:**	02 Nov 2022
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Release		**Estimated time:**	0.00 hour
Target version:	CoCoA-5.4.2		**Spent time:**	0.35 hour

Description

We are distributing CoCoA-5 with just a single executable (with readline).
We should be distributing 2 versions: one with and one without readline.

See #1479

History

#1 - 02 Nov 2022 10:33 - John Abbott

We had already discussed this about 2 years ago (issue #1479)
The script is ready to handle the case of 2 executables,
but we put only one executable in the release.

The other option would be to link statically with everything that readline needs...
I suspect that that is hard to do, as we would already have done so if it were easy.

#2 - 16 Nov 2022 15:45 - John Abbott

- Subject changed from Linux: just 1 execuable, should be 2 (with & without readline) to Linux: just 1 executable, should be 2 (with & without readline)

#3 - 05 May 2024 19:15 - John Abbott

Have we made any progress with this?
Maybe it suffices to make a few small changes to the scripts which make the releases?
