

CoCoALib - Design #1736

Clean TmpGOperations, and remove Tmp prefix

28 Apr 2023 15:58 - John Abbott

Status:	New	Start date:	28 Apr 2023
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Tidying	Estimated time:	0.00 hour
Target version:	CoCoALib-0.99880	Spent time:	0.25 hour
<div>Description</div> <div>How stable/clean is the code in TmpGOperations? It forms a fairly central part of CoCoALib (and thus of CoCoA-5). It would be nice to "promote" it to non-tmp status.</div>			

History

#1 - 28 Apr 2023 16:01 - John Abbott

I had to look in to **TmpGoperations.C** to find out about how CoCoALib implements ideal homogenization (and saturation).
The code I saw looked mostly OK (with some commented out cruft).

It might be a major undertaking to clean & tidy all the code in one go.
Would it make sense to split the file into two parts: one with prefix **Tmp** and one without the prefix?
Perhaps that is just an unnecessary complication?
