### Manual of functions vs ManExamples

03 Jul 2023 18:13 - Anna Maria Bigatti

<b>Status:</b>	In Progress	<b>Start date:</b>	03 Jul 2023
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Anna Maria Bigatti	<b>% Done:</b>	10%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Spent time:</b>	0.00 hour
<b>Description</b>			
In the manual we have things like these:			
<pre>/**/ define fn(X) /**/   assert(X &gt; 0); /**/   return FloorSqrt(X); /**/ enddefine;</pre>			
so that ManExamples can extract the input code. Should we have something like			
<pre>---- function definition ---- define fn(X)   assert(X &gt; 0);   return FloorSqrt(X); enddefine; -----</pre>			
(and the same for package) so that the manual looks more natural? (and with coloured syntax!)

Look at the function

```
void PrintExampleWithoutOutput(std::ostream &out, std::ifstream& in)
```
