<b>Description</b>			
<p>In the general picture of improving the error codes, I suggest a trivial (though extensive) change. Look at these names (just a few)</p> <pre>NotFreeModule NotFullRank NotNonZero</pre> <p>We have many times discussed that from the code/name of the error it's not obvious if you want the object to be, say, full rank or the opposite. I propose to change such codes into</p> <pre>ReqFreeModule ReqFullRank ReqNonZero</pre>
