Description

Add a test for QBGenerator.

PS I made a mistake while updating the QBGenerator code, and all tests passed (so the mistake went undetected).

I notice that there are two mem fns with the following names: myCornerPPIntoQB and myCornerIntoAvoidSet. Shouldn't they both be myCornerPPInto... or myCornerInto...?

Perhaps I should just write a quick test, and then close this issue...

Just to wake up this thread as I have modified QBGenerator lately.

Does anyone actually need myNewCorner list???
