Is that still true? Ask the students ;-)

- Target version changed from CoCoA-5.1.0 Easter14 to CoCoA-5.?.?

I believe I have seen it with the 5.0.9 internal release.
The warning appears just once; a subsequent identical source command did not produce a repeat message.

Lowering priority; it is a minor nuisance, but everything works.

Is this still a problem?
Microsoft Windows 7 is now obsolete...

Maybe we can ask Bernhard Andraschko to check; he does have access to a M$ computer.
I have added him as watcher.
