Description CoCoA-4 manual had a part with the list of commands and a part with "topics" (the latter has been obsolete for ages!). Currently, with nice cross links, the "topics" part is no longer necessary. I suggest we have just one part with the alphabetical list of commands and topics, remove the redundant and/or obsolete sections and move conveniently the remaining useful sections. Eventually think of a short tutorial and cheat-sheet.

It seems that pages like **Introduction to ...** could indeed be nice.
The current one are usually far too long: simplify and update!

The "Intro to XYZ" idea is good, but I do not much like the title.

Maybe "XYZ in CoCoA", or "Using XYZ", or "Creating and Using XYZ in CoCoA"...

Another possibility: "Hints and Tips for XYZ"

Is the idea that these pages would contain some of the "philosophy" of CoCoA?
