CoCoALib - Support #574

Tidy CoCoA root directory

19 Jun 2014 11:22 - John Abbott

Status:	Closed		**Start date:**	19 Jun 2014
Priority:	Normal		**Due date:**	
Assignee:	John Abbott		**% Done:**	100%

Target version:	CoCoALib-0.99560		**Spent time:**	0.35 hour

Description
There are too many files/directories in the CoCoA root directory.   I think we can remove the GPLv2 file since there is also the GPLv3 file.   Perhaps the INSTALL files can be incorporated into the README file?

History

#1 - 28 Apr 2017 11:21 - Anna Maria Bigatti

- Project changed from CoCoA to CoCoALib

- Category changed from Administration to Tidying

- Assignee set to John Abbott

- Target version set to CoCoALib-0.99560

This issue was under "CoCoA" instead of "CoCoALib".
I'm recovering these old and forgotten issues, so we reconsider them.

#2 - 06 Nov 2017 15:24 - John Abbott

- Status changed from New to Resolved

- % Done changed from 0 to 80

I think this has been mostly done.

There is no longer the GPLv2 file, no any file called INSTALL (but there is README).

Currently I have 10 entries in the root directory:
6 directories (configuration/, doc/, examples/, include/, lib/, and src/);
4 files (configure, COPYING-GPLv3, Makefile, README)

It is not clear how this number could be reduced (except perhaps moving examples/ into src/??)

PS note that lib/ is created automatically when the library is created.

#3 - 08 Nov 2017 18:31 - John Abbott

- Status changed from Resolved to Closed

- % Done changed from 80 to 100

- Estimated time set to 0.44 h

JAA thinks the current situation is acceptable, and does not see an easy way to improve it.

Closing.
