Not very important --> low priority.
Not sure how easy this might be; given the low importance, I'd say it's worth doing only if the time needed is little.

#2 - 04 Dec 2014 15:39 - Anna Maria Bigatti

- Subject changed from Use "warning colour" for an unmatched */ to Emacs UI: use "warning colour" for an unmatched */

I agree, it would be nice.
But I have no idea how to achieve it :(
