| It may be helpful to have the emacs UI use a visible "warning colour" for an unmatched */ comment end marker. |             |                        |             |

#### History

##### #1 - 04 Dec 2014 15:22 - John Abbott

Not very important --> low priority.

Not sure how easy this might be; given the low importance, I'd say it's worth doing only if the time needed is little.

##### #2 - 04 Dec 2014 15:39 - Anna Maria Bigatti

- Subject changed from Use "warning colour" for an unmatched \*/ to Emacs UI: use "warning colour" for an unmatched \*/

I agree, it would be nice.

But I have no idea how to achieve it :(
