CoCoALib - Feature #715

RandomSubsetIndices, RandomTupleIndices?

20 May 2015 12:47 - Anna Maria Bigatti

Status:	Closed	**Start date:**	20 May 2015
Priority:	Normal	**Due date:**	
Assignee:	John Abbott	**% Done:**	100%
Category:	New Function	**Estimated time:**	2.00 hours
Target version:	CoCoALib-0.99538 summer 2015	**Spent time:**	0.20 hour

Description			
In CoCoA we have **RandomSubsetIndices, RandomTupleIndices**. Could they be useful in CoCoALib? If so implement translate them into C++ (shifting by 1) and then port them into CoCoA (shifting back by 1).

I have already reported this (and logged time) in issue #622.

I think RandomSubsetIndices is likely to be useful.
If we have RandomTupleIndices in CoCoA-5 then we should probably have it in CoCoALib too (if only to simplify passage of CoCoA-5 code to CoCoALib).

I still do not like the names: they are too long.
