Description

I've recently added GFan. (in configure file)
It took me a few hours (modifying settings for Frobby) to get all the lines done.
Today I added cdd: it took me 30 mins (because I remembered!)

I think we can simplify the process so that there are fewer strings to replace.

- % Done changed from 0 to 10

All the external libraries now have symbolic links in configuration/ExternalLibs/{include,lib}.
Then it should be possible to make it automatic to
- link all the libraries in configuration/ExternalLibs/lib/
- include everything in configuration/ExternalLibs/include/

I've added MathSAT last year: I guess I suffered less, maybe I improved something?
I did not update this issue.
I think we can close this, up to next include...
