Target version:	CoCoA-5.1.3/4 Jan 2016		**Spent time:**	1.05 hour

Description
Right now the version numer for CoCoA is written in 3 different places (CoCoA code, manual, release files). Copy what is done in CoCoALib to have it only in one place.

I suggest adding
COCOA5_VER_MAJ=5.1
COCOA5_VER_MIN=3

to configuration/version
(they do grow together)

I do not much like the name COCOA5_VER_MINMIN.

A quick look at the relevant page of Wikipedia gives several suggestions for the name of the 3rd element. Among those candidates, my preference goes for PATCH or REV (short for REVISION).

it used to be called MINORMINOR ;-)
well.... for us it is more than a "patch". In fact 5 is more than a "major".

Essentially done.
Left to do: fix OnlineManual.C so that version number may be removed from CoCoAHelp.xml

COCOA5_VER_MINMIN is not in configuration/version.
Where is it? I'm looking for it.
