| Category: | CoCoA-5 function: new | Estimated time: | 0.00 hour |
| Target version: | CoCoA-5.1.3/4 Jan 2016 | Spent time: | 2.15 hours |
| Description | | | |
| CoCoA offers SortBy for a sorting a list wrt a given order. Anders would like a fn to find the min/max of a list wrt a given order. | | | |

Do we want these fns?

I already have (simple) implementations in my own personal copy of list.cpkg5.

If we want them then someone must also write documentation.

Yes!

If we want them then someone must also write documentation.

I can do it (after you check them in)

- % Done changed from 20 to 50

JAA has checked that the fns work on a simplish example.

Code checked in.

Anna say's she'll write doc. And a test?

```
>>> l:=["abc","def","g","hijk","lm"];
```

```
>>> MaxBy(l,shorter);  
hijk
```

```
>>> MinBy(l,shorter);  
g
```

#4 - 08 Sep 2015 13:44 - Anna Maria Bigatti

There is only one detail I'm undecided about:

you implemented the function with argument LessThan whereas it came natural to me to implement it as GreaterThan. I'm now investigating how else we use this kind of idea.

#5 - 08 Sep 2015 13:55 - John Abbott

I wanted to be compatible with SortBy and SortedBy, and perhaps also the C++ STL...

OK, I was confused... we always used LessThan. Maybe I should improve the manual ;-)

#7 - 10 Sep 2015 13:41 - Anna Maria Bigatti

Tested and documented (and improved manual for SortedBy)

#8 - 15 Sep 2015 09:34 - Anna Maria Bigatti
