

CoCoALib - Support #861

Janet basis code: TmpJB files give some problems with C++11 (using CLANG/LLVM)

31 Mar 2016 13:08 - John Abbott

Status:	Closed	Start date:	31 Mar 2016
Priority:	Normal	Due date:	
Assignee:	John Abbott	% Done:	100%
Category:	Portability	Estimated time:	3.33 hours
Target version:	CoCoALib-0.99800	Spent time:	3.35 hours
Description			
Bruns has reported compilation errors in the Janet Basis code (files called TmpJB...) when compiling with the flag -std=c++11 on a recent Macintosh which uses the clang/llvm compiler.			
Clean the JB code so that it compiles fine also on that platform (hopefully without having to introduce #ifdef trickery)

[Hide Quoted Text]

Dear John,

we are just preparing Normaliz 3.1.1. On Mac we tried to compile CoCoAKib after the following configuration:

```
./configure --with-cxx=clang++ --with-cxxflags="-std=c++11 -stdlib=libc++ -mmacosx-version-min=10.7"
```

Our CLang is

```
Apple LLVM version 5.0 (clang-500.2.79) (based on LLVM 3.3svn)
Target: x86_64-apple-darwin13.3.0
Thread model: posix
```

It shows a problem with another "JB":

```
/Applications/Xcode.app/Contents/Developer/Toolchains/XcodeDefault.xctoolchain/usr/bin/../lib/c++/v1/list:679:
24: error:
    non-const lvalue reference to type '__node_base' (aka '__list_node_base<value_type, __void_pointer>') ca
nnot bind
        to a value of unrelated type 'std::__1::__list_node<CoCoA::Involutive::JanetHandle, void *>'
        __unlink_nodes(*__f, *__l->__prev_);
                           ^~~~
/Applications/Xcode.app/Contents/Developer/Toolchains/XcodeDefault.xctoolchain/usr/bin/../lib/c++/v1/list:664:
5: note:
    in instantiation of member function 'std::__1::__list_imp<CoCoA::Involutive::JanetHandle,
    std::__1::allocator<CoCoA::Involutive::JanetHandle> >::__clear' requested here
    clear();
^

#2 - 31 Mar 2016 13:11 - John Abbott

Some notes about Bruns's platform:

we are just preparing Normaliz 3.1.1. On Mac we tried to compile CoCoAKib after the following configuration:

```
./configure --with-cxx=clang++ --with-cxxflags="-std=c++11 -stdlib=libc++ -mmacosx-version-min=10.7"
```

Our CLang is

```
Apple LLVM version 5.0 (clang-500.2.79) (based on LLVM 3.3svn)
Target: x86_64-apple-darwin13.3.0
Thread model: posix
```

#3 - 31 Mar 2016 13:20 - John Abbott

JAA tried compiling on a recent Linux box (with recent gcc, version 5.3.1) explicitly setting the flag `-std=c++11`. No compilation errors were found in CoCoALib (but we do need to stop using `auto_ptr`); there is a small problem in `debug_new.C`, but that is not part of CoCoALib.

#4 - 03 May 2016 10:34 - John Abbott

- Status changed from New to In Progress
- % Done changed from 0 to 10

Mario has given me an updated version of his code. He has used the __cplusplus preprocessor variable to have code which works with both C++03 and C++11. It all works fine on my ancient MacBook; perhaps I'll also check on a couple of Linux boxes. I shall check in shortly.

Hoping to take the new code to Osnabrueck this weekend to check that it works fine there too.

#5 - 16 Sep 2016 16:19 - John Abbott

- *Target version changed from CoCoALib-0.99550 spring 2017 to CoCoALib-0.99560*

#6 - 20 Feb 2017 13:12 - John Abbott

@Winfried: could you check whether this problem persists in the latest version of CoCoALib?
There is version from 16 Feb on our website; maybe you already have it?

Thanks,
John.

#7 - 06 Nov 2017 14:02 - John Abbott

- *Target version changed from CoCoALib-0.99560 to CoCoALib-0.99600*

#8 - 12 Jun 2018 18:35 - John Abbott

- *Target version changed from CoCoALib-0.99600 to CoCoALib-1.0*

#9 - 26 Jun 2018 15:21 - John Abbott

- *Related to Feature #82: C++11 compatibility questions added*

#10 - 12 Mar 2020 14:34 - John Abbott

- *Target version changed from CoCoALib-1.0 to CoCoALib-0.99800*

What is the status this issue? Is it now fully resolved?
Anna succeeded (2020-03-11) in compiling on her Mac, presumably using clang.

#11 - 29 Oct 2020 14:26 - John Abbott

- *Assignee set to John Abbott*

- *% Done changed from 10 to 40*

Since we are no longer guaranteeing pre-C++11 compatibility, we can remove from Mario's code all #if trickery related to old versions of the compiler.

The only files involved are TmpJBDatastructure (both header & impl).
I have just commented out the relevant parts. All seems to compile fine, and all tests pass. All examples too.

Should I now remove the commented-out code?

#12 - 30 Oct 2020 15:19 - John Abbott

- *Status changed from In Progress to Feedback*

- *% Done changed from 40 to 90*

Anna says it compiled cleanly now.

JAA: must remove the commented out code.

#13 - 20 Sep 2021 16:17 - John Abbott

- *Status changed from Feedback to Closed*
- *% Done changed from 90 to 100*
- *Estimated time set to 3.33 h*

I have removed the commented-out code (and another function which existed only for that code).

It all compiles, and all tests pass.

So closing this issue.
