| Description | | | |
| Many functions in CoCoALibSupplement are just there because they need conversion from BigInt to long (or vector of BigInt to vector of long). Now there are functions to do this directly (VectorLong, VectorLongDecr1,...) in BuiltinFunctions, so CoCoALibSupplement could be made lighter (see #290#note-8) | | | |

I had already done some cleaning, so that now IsConvertible is not used.
Now I removed the commented out old code.
I think some functions may be moved to BuiltinFunctions

This is one of those "tedious but necessary tasks" for which it is almost impossible to find time.
So postponing.... again!
