

CoCoA-5 - Support #941

Improve coverage of CoCoA-5 tests

10 Oct 2016 21:07 - John Abbott

Status:	New	Start date:	10 Oct 2016
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	enhancing/improving	Estimated time:	0.00 hour
Target version:	CoCoA-5.?.?	Spent time:	0.25 hour
Description			
While trying to "modernize" the CoCoA-5 packages, I thought that running the CoCoA-5 tests would be a good way of tracking down where "backward" names need to be updated. Surprisingly, there were will very many lines of "backward" code even after I made all the tests work: I found them by grepping for <code>\b[A-Z][a-z]*</code> (
Add new tests so that coverage is better (even if 100% is probably too ambitious).

History

#1 - 10 Oct 2016 21:09 - John Abbott

This is likely to be an arduous task, and will surely take a long time.

My hope is that the same tests can still be used when the code is ported to CoCoALib; this would justify the time investment.

NOTE it will be difficult to know whether [#940](#) has been done properly until this issue is resolved.
